***Auxiliary Programs***

BARD-Israel manages a variety of auxiliary programs that are distinct and separate from BARD. These auxiliary programs use funds provisionally allocated to BARD by the Israeli Government and dependent upon the receipt of matching funds from the other locations. BARD's Board of Directors authorized the Executive Director to identify resources in the US or internationally to be used to match the Israeli funds and form a BARD-administered, collaborative agricultural research program to the benefit of scientists in Israel and the partner institution abroad.

BARD's experience and expertise in administrating multinational collaborative agricultural research makes such associations possible. In addition to its regular activities, BARD currently manages collaborative research between scientists in Israel and those at the University of Maryland's Marine Biotechnology Institute, the Texas Department of Agriculture, Cornell University and Agriculture & Ag-Food Canada. This year, the Queensland-Israel Cooperative Agriculture Research Program issued its first call for proposals and these are currently under review.

Information about these programs is available from the BARD office. Click on the links below to see recipients of the auxiliary awards.

Award Years 2004 & 2005

**CB-9002-04 Identification and gene regulation of the desaturase enzymes involved in sex-pheromone biosynthesis of pest moths infesting grain.**

Rafaeli, A.                  ARO, Ministry of Ag.  
Roelofs, W.L.                Cornell University  
Zada, A.                    ARO, Ministry of Ag.

**CB-9006-04 Efficient screening of antibacterial genes by juvenile phase free technology for developing resistance to fire blight in pear and apple trees**

Flashman, M.A.            ARO, Ministry of Ag.  
Aldwinckle, H.S.           Cornell University  
Manulis, S.                ARO, Ministry of Ag.  
Malnoy, M.                Cornell University

**CB-9016-04 Identification of signaling components involved in tomato resistance to bacterial spot disease**

Sessa, G.                   Tel Aviv U  
Martin, G.B.                Boyce Thompson Institute

**CB-9020-05 Etiology of the Rugose Wood Disease of Grapevine and Genetic Manipulation of the Associated Vitiviruses**

Mawassi, M.                ARO, Ministry of Ag.  
Fuchs, M.                   Cornell University

**CB-9025-05 Dark-induced Reactive Oxygen Species Accumulation and Inhibition by Gibberellins: Towards Inhibition of Postharvest Senescence**

Friedman, H.                ARO, Ministry of Ag.  
Watkins, C.B.              Cornell University  
Lurie, S.                    ARO, Ministry of Ag.  
Gan, S.                     Cornell University

**CB-9027-05 Characterization of Enzymatic Anthocyanin Degradation in Brunfelsia and Potato (Solanaceae) using Biochemical, Proteomic and Genomic Approaches**

Oren-Shamir, M.I.           ARO, Ministry of Ag.  
DeJong, W.S.               Cornell University  
Koltai, H.                   ARO, Ministry of Ag.
